

## Tomsed & Boon Edam Turnstile Solenoids – Which one do I need?

Several different solenoids and bracket systems have been used in these full height turnstiles

Ledex/Saia-Burgess solenoids 192917-00x and Pontiac J1203A have non-standard physical configurations. They are also subject to overheating and failure. We offer a replacement solution utilizing the original Guardian solenoid used by Tomsed that is both industry standard and controls heat more efficiently. For identification, Guardian solenoids are gold in color where the Ledex/Saia-Burgess and Pontiac are silver in color.

Here is a typical mounting for a Tomsed or Boon Edam with a Ledex/Saia-Burgess or Pontiac solenoid using the 2 "L" bracket system.

If this is what you are replacing,  
order item 101-008

Here is a typical mounting for a Boon Edam solenoid using the single "U" bracket system

If this is what you are replacing,

order item 10986G-ASBY medium power solenoid for either Fail-lock or Fail-safe configurations

or

10986D-ASBY high power solenoid for Fail-lock only
